PROJECTS

1. **LIBRARY MANAGEMENT SYSTEM**

    This is a web application I have made for Library Management System in which I have used NodeJs and ExpressJs for backend and HTML, CSS, JavaScript for front-end.

2. **E-COMMERCE WEBSITE**

   This is a web-based application for an E-commerce website in which I have used NodeJs and ExpressJs and MongoDB for backend and EJS templating engine for rendering the view in front-end.

3. **ECHO MUSIC APP**

   ECHO is a music player android application. In which I have used kotlin and SQLite database and XML for front-end.

4. **Bank Application**

   This is a web-based application we have made during one hackathon in which I have developed the backend of the application using NodeJs, ExpressJs, and MongoDB.

   I have made pagination logic. And I have stored data in the AWS cloud and fetching it from there.
